

Mecal UNI Applicator – All in One !

The UNI Applicator has definitely solved the issue of crimping different terminals in small batches, at the best quality with a very minimum investment. The UNI Applicator can process all side feed terminals up to 10 mm² cross section just changing the crimpers and the anvils. The main body can be easily adjusted to accommodate any difference in size, thickness, pitch and shape of the various terminals. The set up time of the UNI Applicator stays in seconds. It fits to the Mecal standard Presses with a 135.8mm shut height; different arrangements are available upon request (Released on October 2008)
