

Bundling Automat KTB E9P / E19P

THE SMALL ALL-ROUNDER

Thanks to the small footprint the universal bundling machines KTB E9P and KTB E19P can be easily integrated into the manual or automatic production systems.

UNIVERSAL BUNDLING MACHINE

- To tie off cable sets and / or
- Fixing and marking cable sets or twisted wires
- Programmable tape length and number of revolutions
- Proven components ensure low maintenance and a high reliability
- With the quick release systems the E9P / E19P can be exchanged within seconds to minimize the downtime
- Reproducible, consistently high quality thanks to the process-controlled supply of tape.
- Reliable and accurate bundling of small cross-sections

ALSO AVAILABLE AS COMPLETE SYSTEM

- We can also offer you a complete system with a Robot or a XYZ traversing unit.
- The bundling machine fits in every position (horizontal, vertical, oblique).
- With a width of 34 mm the KTB E9P is able to bundle even short branches.

TECHNICAL DATA KTB E9P AND KTB E19P

Application	bundling, fixing, marking
Weight benchtop machine	approx. 12 kg
Weight control box	approx. 9 kg
Bundle diameter	1,5 – 11 mm
Tape width	9 / 19 mm
Tape material	the most PVC and cloth tapes
Connection	single phase 230V/50Hz, 6 bar compressed air
Dimension (WxHxD) Benchtop Version	240 x 560 x 240 mm
